

# GNN

Liang Hong

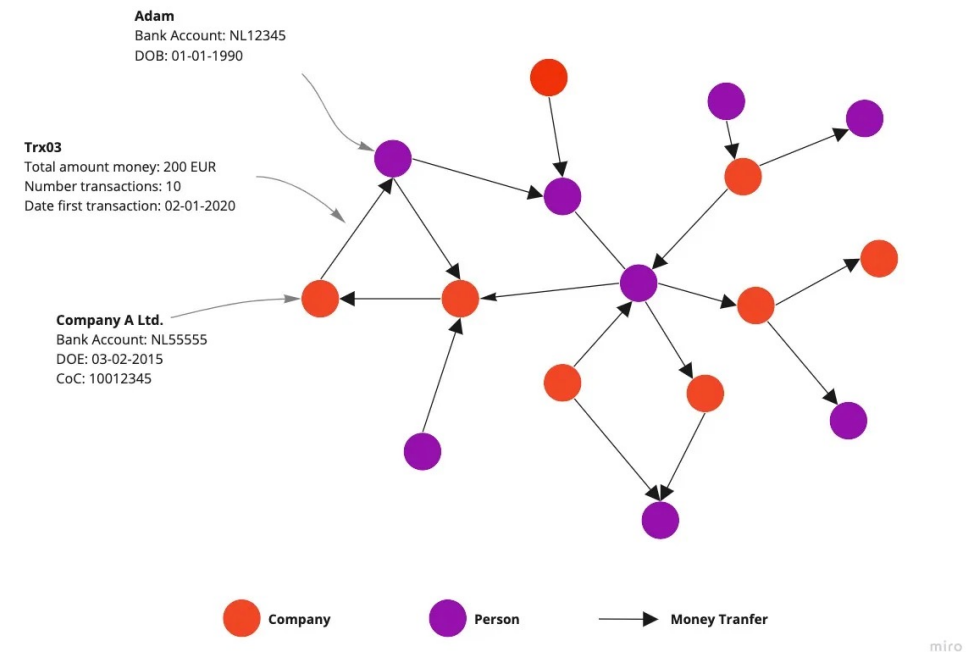

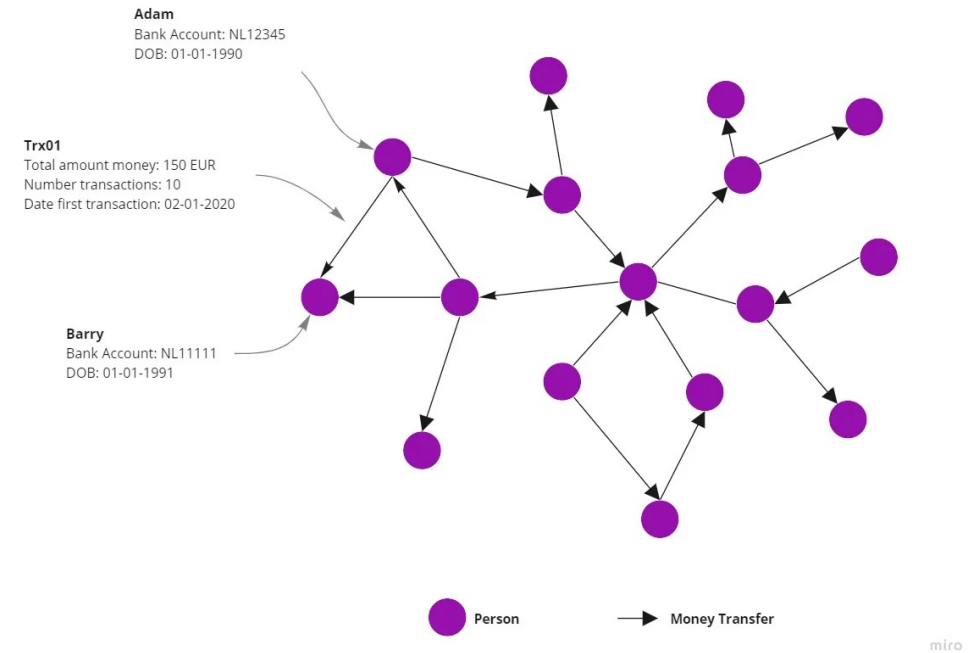

30 Mar 2023

# Outline

- Graph data
- Data type conversion
- NN on graph

# Graph data

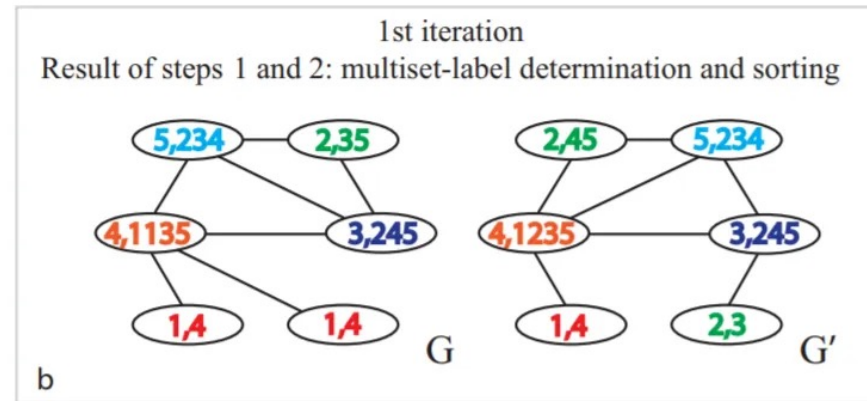

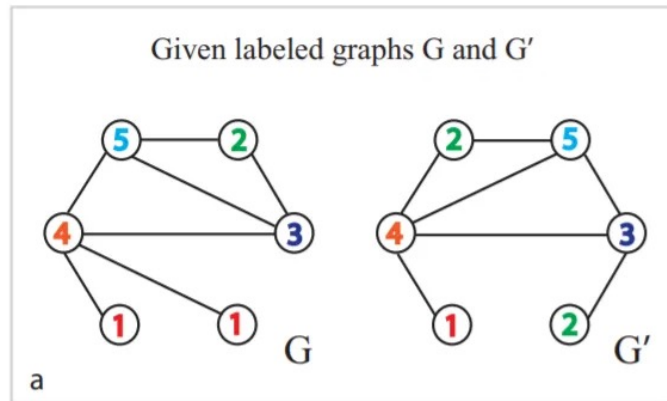

- Directed VS undirected
- Homogeneous VS Heterogeneous
- Weighted VS unweighted
- Geometric (with angle!)

# Data type conversion

- Kernel methods

Mostly used in node classification

WL kernel

Also, there are walk-base kernel etc.

Try to convert graph to multi-dimensional data

# NN on graph

- CNN – GCN/MPNN

- Message passing
- Update embedding

[https://blog.csdn.net/qq\\_44015059](https://blog.csdn.net/qq_44015059)

# NN on graph

- Attention -- GAT
